

ECO-FORTE

“Dirt will be gone”

Eco-Forte is the new cleaner substance that we, as the makers of Flusol-forte, have brought into the market after two years of development.

This new cleaner substance is meant especially for that target group growers that doesn't wish to use a cleaner based on fluoride

Eco-forte is the first product to be proved effective and an profit to the horticulture.

Eco-forte removes: rust, soot, algae, moss, dust, etc.

You can use Eco-forte also if foil and rock wool will stay behind at the end of the cultivation. We recommend to rinse it with a lot of water

Directions for use

1. The dosage that you need depends on how much waste you have. In normal circumstances they use: 6 litres Eco-forte on 100 litres water.
2. Let the solution soak for 10 minutes. Spray it off with a powerful water force.
3. Clean the tools with water after using it.
4. Important: Do not let Eco-fort dry up.

Packaging unit

10 and 20 litres.
